KMF Series

- Miniature
- Solvent Proof
- Low Impedance
- Long Life
- +105°CMaximumTemperature

The KMF series capacitors are designed for low impedances at high frequencies with the case sizes of the KME general purpose capacitors. These capacitors will operate over a wide temperature range, -55° C to $+105^{\circ}$ C, with a load life of between 2,000 and 5,000 hours with the rated ripple current applied, depending on the case size.

The KMF series capacitors up to 100 volts were developed to withstand HCFC cleaning agents for five minutes by ultrasonic, vapor or immersion. This solvent proof design allows all circuit board components to be cleaned together, at the same time, without resorting to more expensive epoxy end-sealed capacitors. Refer to the Mini-Glossary for recommended cleaning conditions.

Summary of Specifications -

- Radial lead terminals.
- Capacitance range: 0.47 to 15,000 µF.
- Voltage range: 6.3 to 450VDC.
- Operating temperature range: -55°C to +105°C for 6.3 to 100V; -40°C to +105°C for 160 to 400V; -25°C to +105°C for 450V.
- Leakage current: See specifications table for leakage current values at +20°C.
- Standard capacitance tolerance: ±20%
- Nominal case size (D×L): 5×11 mm to 18×40 mm.
- Rated lifetime: 2,000 to 5,000 hours at +105°C with the rated ripple current applied, depending on rated voltage and case size.

KMF Series
